DOING PHILOSOPHY

QUARTER 1- WEEK 1 D1

kt012lrm

MOST ESSENTIAL LEARNING COMPETENCY:

- Distinguish a holistic perspective from a partial point of view. PPT11/12-Ia-1.1

Philosophy began through **wonder**!

It all begins with a feeling of curiosity or doubt. When you want to know a certain truth, even before you do investigations, it is always natural for a human being to wonder. Wondering is the primary action when we seek answers to a lot of questions.

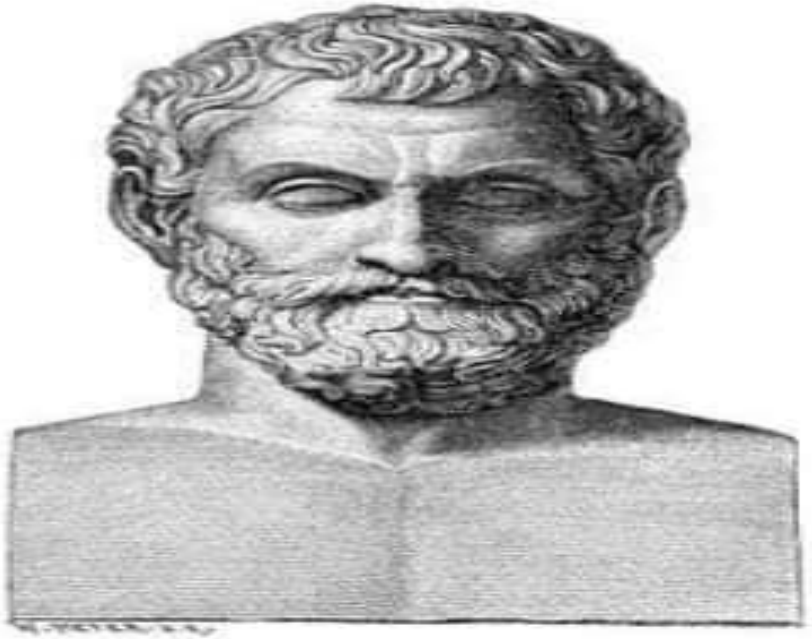
Wondering can be articulated through questions: to philosophize is to ask questions. There are questions that enormously asked even before the early civilizations like, 'What is life made of?', 'How do things come to be, change and pass away?', or 'Is there anything that remains even when everything change?', etc.

During the ancient times, there are many ways to come up with a certain answer. Scientists prove the existence of life in a sensible and observable method. But ancient philosophers tried to **think** deeper than what can be observed. They come up with answers that are non-mythological in nature – meaning, proofs that are not based on beliefs, just pure wonder!

One of best examples among these early philosophers is no other than **Thales** of Miletus, the father of Western Philosophy.

His philosophy is basically about the presence of *water* as the primary substance of reality in all things. He did not incline his philosophy from a mythological perspective. Instead, he used natural explanations for natural phenomena.

Going back to the idea of **wonder**, it all makes sense now! When we think about the word 'WATER' – it is really present in everything! Example, almost 75% of our body is made up of water.



II. LET'S EXPLORE:

Look at the pictures below. What can you say about them? Describe their similarities and differences. Write your answer in your 1 WHOLE YELLOW PAD.

ACTIVITY 1. PICTURE ANALYSIS

ACTIVITY 2. EARTH 4 BASIC ELEMENTS

Follow the instructions carefully. Do this activity for 10 minutes!

EARTH	WATER	WIND	FIRE
Ex. Fruits • _____ • _____ • _____	Ex. Rain • _____ • _____ • _____	Ex. Electric fan • _____ • _____ • _____	Ex. Sun • _____ • _____ • _____

1. There are four icons given above, the 4 basic elements: earth, water, wind and fire.
2. Below each icon, write as many persons/things/foods/places/events as you can – make sure you **think** it is related to these given icons – for 5 minutes!
3. For the next 5 minutes, reflect and answer these questions:

A. Among these elements, which has a largest number of examples?

B. Which has the least number?

C. Why do we need to see the relationship of these elements with all other things?

Doing philosophy can also be applied in making laws. Nowadays, the number of minors involved in criminal acts is rising. There had been proposals by some legislators that the age of criminal liability be reduced to 15 years old as opposed to the usual 18 years old.

Make your arguments regarding this issue. Write your clear and valid arguments in one whole yellow pad. Your arguments will be grade using the rubric below.

DOING PHILOSOPHY

QUARTER 1- WEEK 1 D2

kt012lrm

MOST ESSENTIAL LEARNING COMPETENCY:

- Distinguish a holistic perspective from a partial point of view. PPT11/12-Ia-1.1

WHERE DID PHILOSOPHY ORIGINATE?

Philosophy traces its roots in Ancient Greece in the 6th Century BCE. Traditions had it that the word Philosophy was first coined by Pythagoras, a Greek mathematician. He used this term to classify three classes of people who attended the ancient Olympic Games as lovers of gain, lovers of honor; and lovers of knowledge or wisdom (Caraan 2016, 2). He favored the third class for not being driven by profit nor honor. Instead, they sought ways to arrive at the truth. He then called these people as philosophers. Among the ancient Greeks, philosophers became pioneers in history, biology, medicine, mathematics, astronomy, and even physics.

WHAT IS PHILOSOPHY?

Many philosophers could not agree on the exact definition of the word philosophy. Despite its varying definitions and lack of general agreement to it, it does not mean that the term cannot be defined and characterized. Here are some popular definition of philosophy:

Etymological definition

The word philosophy is derived from *philosophia* which is a combination of the Greek terms *philos* (love) and *Sophia* (wisdom). Thus, philosophy means love of wisdom." Philosophers, therefore, are the people who are "lovers of wisdom" (Amanze, et. Al., 2010)

Technical definition

Philosophy can be best defined as the science of the first causes (Maritain, 2005). It seeks to know and clarify the very source of which all the chain of causes ultimately all go back to it. Philosophy is also a science since it utilizes reason and logic in an attempt to understand reality and answer fundamental questions concerning knowledge, life, morality, and human nature.

WHAT ARE THE BRANCHES OF PHILOSOPHY?

Metaphysics	**Study of Existence**	**What's out there?**
Epistemology	Study of Knowledge	How do I know about it?
Ethics	Study of Action	What should I do?
Aesthetics	Study of Art	What can life be like?

PHILOSOPHY CAN BE DIVIDED INTO FOUR MAJOR BRANCHES NAMELY:

Metaphysics

Metaphysics is the branch of philosophy that deals with the examination of existence (Landauer and Rowlands 2001, para. 1). It answers queries like "What is the meaning of life? What is the purpose of life? Does God exist?".

Epistemology

Epistemology studies the process of attaining knowledge. It answers the question,
'How do we know?". Among the biggest concerns of epistemology are the origin and the verification or the confirmation of knowledge. It is also concerned with how the human person's mind is associated with reality; and whether these relationships are valid or invalid (Landauer and Rowlands 2001, para. 1).

Ethics

Ethics is a branch of philosophy dealing with correct judgment. It answers the question, "What I ought to do?" It is the study of right or wrong in human actions (Landauer and Rowlands 2001, para. 1). It is concerned about human conduct. It deals with norms or standards of right and wrong applicable to human behavior.

Aesthetics

Aesthetics is a branch of philosophy that delves into art (Landauer and Rowlands 2001, para. 1). The study includes what art is and the purpose behind it . The philosopher is concerned with the analysis of aesthetic experience and the idea of what is beautiful. It attempts to answer questions like "is art subjective?"

Activate the philosopher in you by formulating your five (5) philosophical questions to each branch of philosophy. Copy the table below in a one whole yellow pad.

Branch of Philosophy	Philosophical Question
Metaphysics	1. 2. 3. 4. 5.
Epistemology	1. 2. 3. 4. 5.
Ethics	1. 2. 3. 4. 5.
Aesthetics	1. 2. 3. 4. 5.

DOING PHILOSOPHY

QUARTER 1- WEEK 1 D3

kt012lrm

MOST ESSENTIAL LEARNING COMPETENCY:

- Realize the value of doing philosophy in obtaining a broad perspective on life PPT11/12-Ia-1.2

The term **Philosophy** came from two Greek words ***philo*** and ***sophia*** which means “to love” and “wisdom”, respectively. Simply put, Philosophy means the love of reasoning making wisdom as its primary goal. Technically, Philosophy is defined as the science that by natural light of reason studies the highest principles of things.

In order to understand further the meaning of Philosophy, the following salient features of it must be taken into consideration:

Philosophy is a science.

It is called as such because it is systematic and follows certain steps or procedures. In short, it is an organized body of knowledge same as any other sciences.

It employs Natural Light of Reason.

This means that philosophical investigation does not use any laboratory instrument, investigative tools nor supernatural approach. Philosophers use their natural thinking capacity or use the so-called unaided reason.

Philosophy is inclined to Study All Things.

Other sciences concern themselves with a particular object of investigation such as: anthropology which deals with human beings in relation with the society; sociology focuses on society, its forms, structures and functions; botany concentrates its attention on plants; Philosophy may deal with human beings, society and plants among others. It is this character that Philosophy is considered multidimensional or holistic.

Philosophy employs First Cause or Highest Principle.

Note that principle means a reason (or an explanation) from which something proceeds in any manner whatsoever.

Complete the table below. Write your answers in a 1 whole yellow pad.

My own Perspective

ACTIONS	WHAT MUST BE DONE BEFORE THE ACTION?
1. Buying new clothes	
2. Choosing friends	
3. Eating food	
4. Deciding where to study for Senior High School	
5. Going to school	
6. Visiting a friend	
7. Playing computer games	
8. Buying a new gadget	
9. Helping a stranger	
10. Traveling without your family	
11. Watching movies that are not allowed for your age	
12. Posting your opinion or feelings in the social media	
13. Communicating to your siblings about a conflict	
14. Giving opinions	
15. Going out with the opposite sex	

B. As a grade 12 student, what have you realized about the activity **“My own Perspectiv**e”? Reflect and explain your answer in a 1 whole yellow pad.

DOING PHILOSOPHY

QUARTER 1- WEEK 1 D4

kt012lrm

MOST ESSENTIAL LEARNING COMPETENCY:

- Realize the value of doing philosophy in obtaining a broad perspective on life PPT11/12-Ia-1.2

Why does philosophy value questioning?

In philosophy, almost all questions are valid since they aim at understanding the world better. Any question that is genuinely felt and allows further exploration can be a philosophical one. In a general sense, questions are more important than the answers in the realm of philosophy.

For **Plato,** "Philosophy begins in wonder" (Abella 2016, 7). This means that one begins to embark on his philosophical journey through a life of questioning and searching the truth. Thus, philosophy starts with a feeling of curiosity and puzzlement. And it is man's role to be in search of answers.

Why does philosophy value questioning?

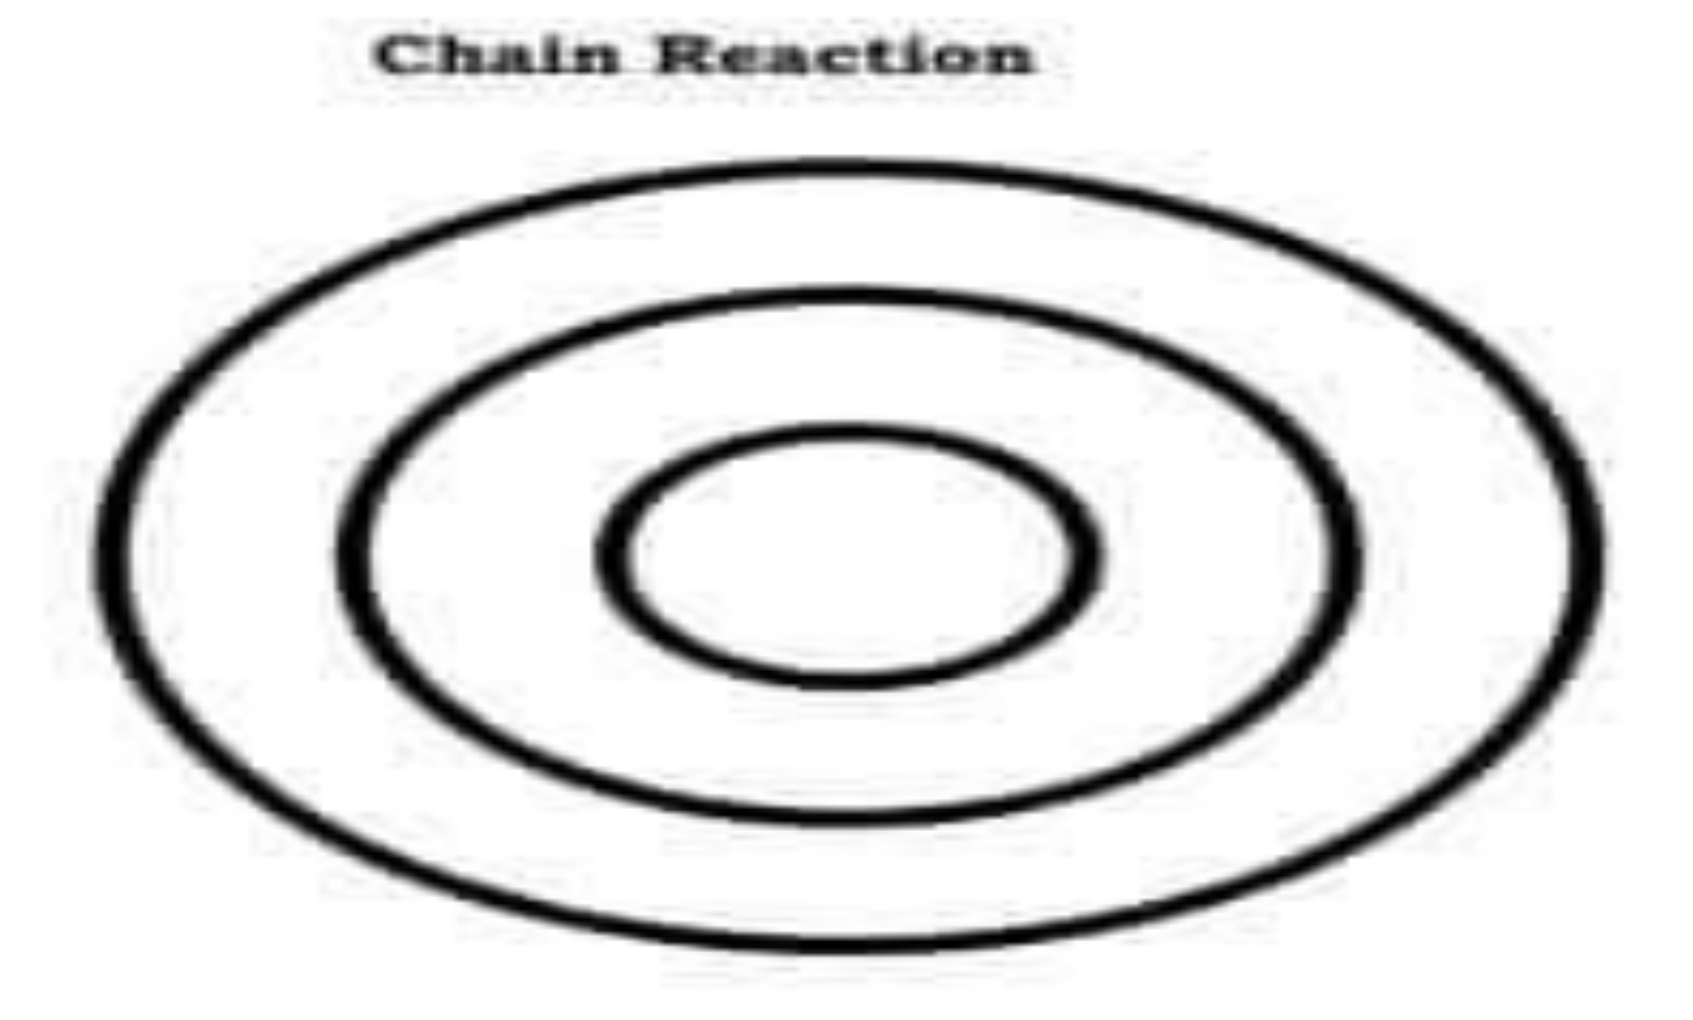
The habit of questioning can activate the mind to think and find solutions to different problems. Questions can help improve the body of knowledge since they can either challenge existing information or refine it. This is the reason why philosophy will endure because the act of questioning is eternal (Dy, 2005).

Why we need Philosophy?

Philosophy plays an important role in one's life. Students who learn philosophy get a great many benefits from doing so. Here some practical uses that one can get if he ventures in this undertaking:

1. Philosophy enables a person to engage in critical analysis and interpretation of concepts definitions, arguments, and problems.
2. Philosophy also improves problem-solving and decision making.
3. A philosopher is a wise communicator who can clear and adequately present his or her ideas.
4. Wisdom is one intended product of philosophizing, and this refers to a person's ability to apply knowledge to daily life, particularly in making sound choices and judgment.
5. Finally, knowledge of philosophy can contribute to self-development.

Using the ripple effect diagram below, write a willful (deliberate) act at the center. In the next circle, write down the effects of that act on yourself. Then, write how others were affected by your decision at the outermost part of the diagram.



Scoring Rubric

CATEGORY	5	3	1
Personal Sharing	The personal sharing is relevant, complete and substantial	The personal sharing is relevant, and substantial yet incomplete	The personal sharing is irrelevant, unsubstantial and incomplete
Readability of Text	All texts are readable and legibly written	Some texts are readable and not legibly written	Most of the texts are not readable and not legibly written
Spelling and Grammar	No errors in grammar and spelling	2-3 errors in grammar and spelling	More than 5 errors in grammar and spelling

Situational Questions: Given the following situations. What will you do?

1. You saw your girlfriend/ boyfriend holding hands with someone else.
2. Your baby brother is wearing your favorite red shirt.
3. Based on your responses, do you think you did an act of philosophizing?
